PROFESSIONAL SUMMARY

BS Data Science student with hands-on experience in Python backend engineering, REST API development, database systems, automation, and AI/ML integration. Built production-grade systems using FastAPI, PostgreSQL, Redis, Celery, Docker, and LLM-powered pipelines. Seeking a Software Engineering, Backend, Python, AI/ML, or Data Science internship.

TECHNICAL SKILLS

Languages: Python • SQL • JavaScript • HTML • CSS	LLM & Automation: LLM Integration • OpenAI API • Prompt Engineering • AI Automation Pipelines
Backend: FastAPI • Flask • SQLAlchemy • REST APIs • Celery • SMTP / Brevo API	Scraping / Test: Playwright • Selenium • BeautifulSoup4 • PyYAML
Databases: PostgreSQL • SQLite • Redis • RDBMS Schema • SQL Triggers • Stored Procedures	DevOps / Tools: Docker • Docker-Compose • Nginx • Linux CLI • Git • GitHub
AI / ML: TensorFlow • Scikit-Learn • Pandas • NumPy • DNN • Predictive Classification	

PROJECTS

SmartScrape Pro — Enterprise Web Scraping SaaS [\[FastAPI • PostgreSQL • Redis • Celery • Playwright • Docker\]](#)

- Multi-tenant SaaS with async SQLAlchemy 2.0 ORM, per-tenant PostgreSQL isolation, JWT (RS256) auth, and Stripe webhook billing.
- Concurrent scraping via Celery + Redis; auto-scaling workers with Celery Beat cron scheduling; full Docker-Compose containerization.

Email Automation & Bulk Sender Platform [\[Python • Selenium • Pandas • SMTP • Brevo API\]](#)

- Concurrent Selenium WebDriver automation with PyYAML config injection and Pandas CSV template rendering for personalized bulk outreach.
- SMTP + Brevo API dual-channel pipeline for auto-generating and dispatching daily analytical reports across 1,000+ recipient datasets.

CryptoGuard-AI & Clinical AI Diagnostics [\[TensorFlow • Scikit-Learn • Streamlit • Python\]](#)

- End-to-end multi-class predictive pipeline achieving 85% accuracy on healthcare records with serialized low-latency inference.
- Streamlit dashboard with live crypto feed ingestion, ML-based risk classification, and real-time fraud-signal alerting.

Eco Ride — Fleet & Fuel Analytics Platform [\[Flask • SQLAlchemy • SQLite • Flask-Login • Flask-Bcrypt\]](#)

- Secure multi-user app with role-based access control; analytics dashboard visualizing GPS routes, fuel trends, and fleet KPIs.

Charity & Donation Transparency System [\[PostgreSQL • SQL Triggers • Stored Procedures • Views\]](#)

- High-performance relational schema with SQL Triggers, Stored Procedures for real-time financial tracking, and optimized SQL Views for audit reporting.

AI & AUTOMATION

- LLM-Powered Automation:** OpenAI API integration for intelligent data summarization, prompt-driven report generation, and AI-assisted content routing.
- AI Diagnostics Assistant:** Streamlit-based clinical risk interface with real-time SVM classification and exportable patient risk reports.
- Automated Reporting Engine:** Pandas aggregation + SMTP HTML digest pipeline eliminating manual daily reporting workflows.

EDUCATION & LEADERSHIP

BS Data Science — Superior University, Lahore

2024 – 2028

Machine Learning • Database Theory • AI Engineering • Data Analytics • Statistical Modeling

- ★ **Honhaar Scholarship Recipient** — merit-based government scholarship for academic excellence.
- Elected Student Voice Leader (SVL)** — selected via faculty evaluation panels, technical interviews, and student-wide voting (2024–2027).

CREDENTIALS & COMMUNITIES

- Google Developer Program** — cloud sandbox environments for ML deployment and Data Science projects.
- NVIDIA Developer Community** — distributed system acceleration and hardware-optimized deep learning.
